SUMMARY

Results-driven Software Engineer with expertise in full-stack development, cloud infrastructure, and machine learning. Eager to build scalable solutions and seeking impactful Software Engineering and Machine Learning Engineering roles.

EDUCATION

Ying Wu College of Computing, NJIT — **Jan 2024 – May 2026**
*M.S in Artificial Intelligence - **CGPA - 3.58/4*** — *Newark, USA*

Manipal Institute of Technology, MAHE — **Jun 2017 – Aug 2021**
*B.Tech in Computer Science and Engineering - **CGPA - 7.83/10*** — *Manipal, India*

EXPERIENCE

MyHealthToday — **Dec 2020 – Jun 2021**
Software Engineering Intern — *Remote*

- Developed a cross-platform front-end using React for web browsers and React Native for mobile apps, ensuring responsiveness across devices through collaboration with the CTO and rigorous technical problem solving.
- Created comprehensive test suites to verify application adherence to design specifications and compatibility with target customer devices, enhancing reliability.
- Implemented design patterns (adapter, state, observer) using React-Redux to establish a single source of truth, optimizing state management for the mobile app.
- Standardized record formats in DynamoDB tables via scripting, proactively preventing future run-time errors further demonstrating problem solving.
- Developed microservices using serverless AWS Lambda functions, contributing to a scalable cloud infrastructure for mobile and Alexa applications.
- Designed, implemented, and deployed RESTful APIs using SAM CLI and AWS CI/CD tools, streamlining resource creation and reducing client-side processing time by 16%.

PUBLICATIONS

Statistical Analysis of Sentence Structures through ASCII, Lexical Alignment and PCA — **Mar 2025**
A. SAHDEV, arXiv

PROJECTS

Study of Selected Clustering Algorithms with Generated Datasets | Python — **Nov 2024**

- Benchmarked unsupervised machine learning algorithms such as K-Means and Hierarchical Agglomerative Clustering on three datasets in which outliers were removed using IQR.
- Achieved top silhouette scores with K-Means on Dataset 1 (0.359, 3 clusters) and Dataset 2 (0.625, 2 clusters), and with Agglomerative on Dataset 3 (0.984, 2 clusters.)

Analyzing Oxford Government Response Tracker Dataset | Python, Scikit-Learn — **Apr 2024**

- Conducted data engineering, data wrangling and cleaning appending suitable columns with appropriate imputation strategies followed by exploratory data analysis on a dataset with 56 columns and 202,760 tuples.
- Curated experiments through research for two supervised machine learning approaches multivariate linear regression on daily mortality rates, achieving an R^2 score of 0.974 and MSE of 0.0003 and daily policy effectiveness using a decision tree classifier with an F1 score of 0.984.

Open Source Contribution | React Native — **Apr 2021**

- Introduced a boolean argument to display number of selected_items in react-native-multiple-select by toystars [**550+ stars, 500k+ downloads**].

SKILLS

Languages: Python, Javascript, C++, Java, Dart, SQL, No-SQL
AI/ML Libraries: scikit-learn, PyTorch, TensorFlow
Frameworks/Tools: Django, React, React Native, Flutter, Git, AWS, Docker, MySQL
