EDUCATION

Ying Wu College of Computing, NJIT
M.S in Artificial Intelligence - CGPA - 3.58/4

Jan 2024 – May 2026
Newark, USA

Manipal Institute of Technology, MAHE
B.Tech in Computer Science and Engineering - CGPA - 7.83/10

Jun 2017 – Aug 2021
Manipal, India

EXPERIENCE

MyHealthToday
Software Engineering Intern

Dec 2020 – Jun 2021
Remote

- Developed a cross-platform front-end using React for web browsers and React Native for mobile app to ensure responsiveness across devices.
- Created test suites to ensure that the application adhered to the design and was supported on target customer devices.
- Implemented several Design Patterns like adapter, state and observer using React-Redux to create a single source of truth while developing the mobile app.
- Standardized formats of records in DynamoDB table using a script, preventing run-time errors in the future.
- Developed microservices using serverless AWS Lambda functions to create a scalable backend for the mobile and Alexa application.
- Designed, implemented and deployed RESTful APIs using SAM CLI and AWS CI/CD tools, reducing resource creation time at client side by 16%.

PUBLICATIONS

Statistical Analysis of Sentence Structures through ASCII, Lexical Alignment and PCA
A. SAHDEV, [arXiv](#)

Mar 2025

PROJECTS

Study of Selected Clustering Algorithms with Generated Datasets | Python

Nov 2024

- Benchmarked K-Means and Hierarchical Agglomerative Clustering on three datasets in which outliers were removed using IQR; achieved top silhouette scores with K-Means on Dataset 1 (0.359, 3 clusters) and Dataset 2 (0.625, 2 clusters), and with Agglomerative on Dataset 3 (0.984, 2 clusters).

Analyzing Oxford Government Response Tracker Dataset | Python, Scikit-Learn

Apr 2024

- Conducted data engineering, data wrangling and cleaning appending suitable columns with appropriate imputation strategies on a dataset with 56 columns and 202760 tuples.
- Performed exploratory data analysis, creating new features to inculcate lagged effects on global mortality rates and effectiveness of policies.
- Designed and implemented an experimental setup for multivariate linear regression on daily mortality rates, achieving an R^2 score of 0.974 and MSE of 0.0003; modeled daily policy effectiveness using a decision tree classifier with an F1 score of 0.984.

Open Source Contribution | React Native

Apr 2021

- Introduced a boolean argument to display number of selected items in react-native-multiple-select by toystars [**550+ stars, 500k+ downloads**].

SKILLS

Languages: Python, Javascript, C++, Java, Dart, SQL, No-SQL

Libraries: scikit-learn, PyTorch, TensorFlow

Frameworks/Tools: Django, React, React Native, Flutter, Git, AWS, Docker, MySQL
